

Keep your dog safe in hot weather

Hot weather can be dangerous for dogs. Heatstroke can develop quickly, even on warm rather than extremely hot days.

Keep your dog cool

- Make sure your dog always has access to fresh drinking water and shade.
- Walk your dog early in the morning or later in the evening when it's cooler.
- Check pavements before walking – if it's too hot for your hand, it's too hot for your dog's paws.
- Puppies, older dogs, flat-faced breeds, overweight dogs and dogs with health conditions are particularly at risk.

Avoid heatstroke

- Enclosed spaces such as parked cars, caravans, lodges and park homes can become dangerously hot in warm weather. Avoid leaving your dog unattended inside.
- Encourage your dog to rest during the hottest part of the day.
- Watch for signs of heatstroke, including excessive panting, heavy drooling, difficulty breathing, lethargy, vomiting or collapse.

If your dog becomes unwell

- Move your dog into the shade immediately.
- Cool them with cool (not ice-cold) water, concentrating on the body, neck and legs.
- Contact your nearest vet straight away and let them know you're on your way.

Please follow any additional advice provided by park management.

Thank you for helping to keep your dog safe while enjoying your stay.
